Time and Attendance – with integrated Access Control and Data Capture facilities
ONE SYSTEM ONE SOLUTION

LOGGING ON TO A JOB

TimeNet Data Collection:

JOB's are added and given prompts and information; a job badge is added/assigned. The employee presents the job card to the terminal and is prompted to present their own attendance card/proximity fob, at this point other prompts may be added, If the employee has not clocked in when they try to action data the system will inform them that they have not clocked in, this improves the efficiency of health and safety with regards to tracking employees in the event of an emergency.

Timenet Standard Data Collection Reports include:

Clocking report - Job employee report - Job totals report - Work in progress report, Bespoke reports are available, so you get the

Timenet allows a detailed analysis of each transaction, by setting up extra fields, such as: Jobs – Operations - Sub Sections - Quantities even meal menus so employees are prompted to enter data at each level, information fetched can be edited or exported for extensive reporting.

Ethernet Data Collection Terminal

Proximity Job Badges

Proximity employee key-ring fobs
