### MICRONET TIME AND ATTENDANCE SYSTEM

"Micronet" caters for up to 50 current personnel and stores data on past employees, the system has been designed for its ease of use and user friendly software.

The Micronet system assists companies in speeding up payroll preparation and enables electronic registration of employees and visitors for evacuation reporting etc. and does not require a dedicated PC.

The system comprises of an intelligent stand alone terminal (clocking point) which has a robust cast aluminium front together with a battery back-up as standard that you control simply and effectively from your office PC or workstation using "TimeNet" time management "Windows" based software complete with full reporting features and email options.

#### COMPATABILITY

Micronet is part of our Timenet series of clocking terminals and can be upgraded at any time to a full Timenet system so it can grow as you do without the need to replace your existing hardware and investment.

Biometric using finger-print

#### Main features

Low cost time and attendance system
Up to 50 employees per site with no limit of clocking per day
Stand alone does not require a dedicated PC
Real-time updating
Stores clockings via on board flash card
Payroll output file (CSV) links to "Sage payroll" and others
Fixed, Rotating, Continental and Flextime shifts
Paid breaks and auto deduction of lunch
Swipe cards or proximity badges or key fobs & Biometric
Automatic BST/GMT (summer and autumn time change)
Extensive reporting facilities – including standard reports
Programmable relay contacts for sounders (tea breaks etc)
RS232 or TCP/IP Ethernet - RJ45 connection
Connects directly to your Fire alarm (option)
Network output to printer (auto fire reports option)
Easy install for wall mounting
Remote site application (Micronet plus)

#### Employees clocking options

Swipe Card
Proximity Badge
Proximity Key-fob
Key-pad (4 digit number)
Biometric (finger print)
or a combination of the above

UK Built System

# "TimeNet" software speeding up payroll preparation

The sample reports show overtime calculated daily, "TimeNet" could show it calculated weekly or over any period, together with any comments for adjustments made.
