Time and Attendance – with integrated Access Control and Data Capture facilities

ONE SYSTEM ONE SOLUTION

Timenet handles employees Time and Attendance – Access via doors, gates and turn-stiles with Data capture via terminals allowing management the benefits of powerful reporting and the transfer of data, speeding up payroll preparation and enables electronic registration of employees and visitors for evacuation reporting etc. with much more…….

Reports cover: Pay (total hours and gross pay) - Infringements - Absence - Working Time Directive - Holidays - Fire (evacuation) - Bradford Factor - Flextime – Access time and dates - Payroll output file (CSV) - Department reports and more………..

Timenet does not require a dedicated PC.

Intelligent and stand-alone, the terminals made from robust cast aluminium have battery back-up as standard, which you control simply and effectively from any PC or server using "TimeNet" Time Management "Windows" based software.

Payroll output file linked to payroll securing and speeding up pay day, with no errors inputting payroll totals, taking out this tedious task.
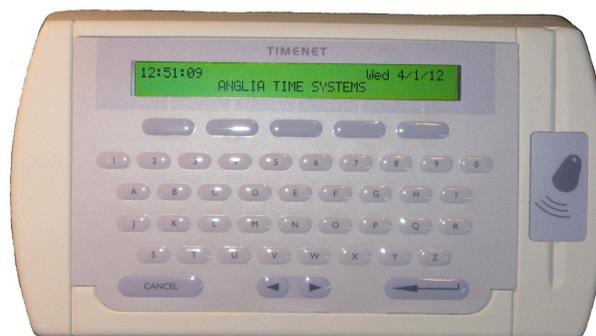

ODBC/SQL interface allows the use of other packages to produce reports or import data directly into spreadsheets, word processors etc.
